NOAH is the trade association for the UK’s animal medicines sector, promoting the benefits of safe, effective, quality medicines for the health and welfare of all animals.

Animals benefit our society – they provide companionship and produce safe, nutritious food. All animals, whether pets or farm animals, have a right to be treated with the appropriate medicine to treat and prevent disease and reduce suffering.

Before they can be prescribed and sold, all our animal medicines undergo strict scientific assessment by the independent veterinary medicines regulatory body. We work to protect access to safe, effective medicines for all animals, and encourage innovative product development.

For over thirty years, NOAH has worked to improve animal health and welfare:
- encouraging responsible pet ownership through campaigns, such as I Heart My Pet and National Pet Month
- informing the public about animal medicines and working to dispel myths and misinformation
- providing professional training (NOAH Certificate of Animal Health) to those involved in selling animal medicines
- NOAH’s Compendium, online and hard copy, offers up-to-date information on licensed medicines
- effective self-regulation through the NOAH Code of Practice means that prescribers and users can trust promotional material

NOAH members provide a range of medicines and vaccines, available to prescribers and animal owners – supporting the high standards of animal health and good welfare our society expects.

Animal medicines help us all
Animal medicines protect pets and farm animals, and they protect us too
- they improve animal welfare by reducing sickness and disease
- help prevent diseases passing between animals and humans – around 60% of the 1,500 infectious diseases we know of can pass between animals and people
- help farmers provide nutritious food which is safe for us to eat

Pets are good for us – be good to them

Did you know that pets save the NHS at least £1.6bn every year?
- stroking a pet or watching fish in an aquarium can reduce blood pressure and lower anxiety
- pets help combat loneliness and increase social interactions
- children living with a cat or dog have stronger immune systems and fewer allergies linked to asthma
- pet owners are healthier, e.g. in Germany they visit the doctor 15% less often

Promoting the benefits of safe, effective, quality medicines for the health and welfare of all animals
We all depend on animals in some way – for food, companionship, assistance or leisure. We rely on the UK animal medicines sector to help keep animals healthy and protect their welfare. Our medicines treat and prevent disease – it’s not possible to raise livestock or keep pets without them.

Across Europe, the market for animal health products is around €5bn. The police, firefighters and other emergency services call upon nearly 1,500 working dogs. The UK produces over 165k tonnes of farmed fish every year. Nineteen thousand, seven hundred vets, nine thousand qualified animal health advisers, eleven thousand veterinary nurses, and thousands of livestock farmers and people involved in pet and equine care, sport and leisure are employed by NOAH members. The industry invests £500m across Europe in research and development, creating and improving veterinary medicines to keep animals healthy.

NOAH members provide a range of medicines and vaccines, available to prescribers and animal owners – supporting the high standards of animal health and good welfare our society expects. British families care about the welfare of their pets, spending £6bn on their care every year. That generates £2.2bn of tax revenue. All animals have a right to access to the correct medicines to treat them when they are sick and keep them healthy to support good welfare.

Our industry supports many others, including:

- 19,700 vets
- 9,000 qualified animal health advisers
- 11,700 veterinary nurses
- Thousands of livestock farmers and people involved in pet and equine care, sport and leisure
- Specialist research units at eight UK universities

Pets are kept by 13m UK households. At any given time there are around 140m cows, pigs, sheep and chickens in the UK. The industry supports many others, including: 8,000 guide dogs, 1,600 hearing support dogs and hundreds more animals support people with disabilities across the country.
