

#VaccinesWork

Storage of vaccines

Correct
fridge storage
between 2-8°

Incorrect storage
temperature **impacts**
vaccine potency

Keeping cool when on the road

Leaving a vaccine
for **30 minutes** in a hot
vehicle can render it
ineffective

Use a **cooler**
box or **bag** when
transporting vaccines

Use a
dedicated
medicines
fridge

Middle of the fridge has the
most **constant** temperature

Store vaccines in
date order and use
in sequence

ONLY USE
vaccines in date
