

Environmental Policy

NOAH

(National Office of Animal Health)

2023

NOAH: Environmental Policy

NOAH represents the UK animal health industry; we promote the benefits of safe, effective, quality licensed medicines and solutions for the health and welfare of all animals. We acknowledge that our operations may influence the environment and have identified key business aspects that contribute to our environmental and carbon footprint:

- Transport emissions.
- Procured goods and services with their own environmental impact.
- Consumption of power and water.

NOAH is committed to tackling the organization's environmental impact as we believe all individuals and businesses have the responsibility to contribute to a sustainable future. NOAH is contributing to assure a sustainable future by utilizing the investors in the environment scheme to develop and improve the environmental impact of our business operations as we progress through the accreditation. NOAH is also committed to helping its member companies and the animal health sector to focus on environmental health through the work commenced via the environmental health and sustainability subcommittee.

Our environmental commitment can be demonstrated in our established objectives below:

- Compliance with all applicable standards, laws, requirements, regulations, and member & public expectations.
- Monitor our key resources, set targets and reduce resource use by 2024.
- Follow a waste & recycling policy.
- To encourage all members of staff to become more environmentally aware of their impact and carbon footprint by undertaking sustainability training courses.
- Continue towards implementing more sustainable technology for staff members.

We will continue to improve our environmental management system by working to the Investors in the Environment (iiE) criteria, considering any changes in legislation, our organization, and other factors. We will convey this policy to all our employees, ensuring that they are provided with training to increase awareness of environmental matters.

Joanne Jeffs and Jodie Bartels are our Sustainability Champions and are designated responsibility for the day-to-day implementation of this policy.

NOAH will make this policy available when requested to interested parties including members of the public, including making a copy available on the NOAH website.
